

 MADE IN ITALY 

La famiglia Ghidini, da ottant'anni, opera con successo all'interno del settore della maniglieria, seguendo costantemente quelle due linee guida che hanno sempre contraddistinto negli anni i loro prodotti: l'unione armonica di tradizione e innovazione e la cura attenta del loro aspetto qualitativo. Tali ambiziosi obiettivi sono stati raggiunti anche grazie alla presenza di collaboratori esterni altamente qualificati, attenti alle esigenze di un mercato sempre in continua evoluzione, attraverso la ricerca di design di tendenza e la messa in atto di soluzioni tecnologiche per finiture altamente innovative. Con l'esperienza del passato e lo sguardo proiettato costantemente nel futuro, SICMA vi propone in questo catalogo, accanto alla tradizione, tutte le novità inerenti alle nuove realizzazioni.

Pierluigi e Piersilvio Ghidini

For over eighty years the Ghidini family has operated successfully in the field of door-handles, constantly following those two guidelines that have always distinguished their products over the years: the harmonic union of tradition and innovation and careful attention to their qualitative aspect. These ambitious aims have also been achieved thanks to the presence of highly qualified external collaborators, attentive to the needs of a market always in continuous development, through design trend research and putting technological solutions for highly innovative finishings into practice. With the experience of the past and constantly facing toward the future, the SICMA Company proposes in this catalogue, beside tradition, all the novelties inherent in the new creations.

SICMA PER L'AMBIENTE

SICMA FOR THE ENVIRONMENT

Con l'acquisizione di un centinaio di ettari piantumati in collina, Sicma Maniglie è sempre stata sensibile nel campo dell'abbattimento di CO₂. Inoltre i nostri impianti produttivi utilizzano materia prima riciclata e consentono quindi di abbattere dell'89% le emissioni di CO₂ nella fase di raffinazione del prodotto.

La nostra strategia è da sempre quella di anticipare i tempi in ottica di sviluppo sostenibile.

Pertanto i nostri impianti di pressofusione sono dotati di motori "Green Line" in grado di avere i seguenti vantaggi: risparmio energetico dell'80%, necessità di raffreddamento del fluido estremamente ridotta, sensibile abbattimento dei livelli di rumorosità.

With the acquisition of a hundred hectares planted in the hills, Sicma Maniglie has always been sensitive to CO₂ abatement.

In addition, our production plants use recycled raw material and thus enable an 89% reduction in CO₂ emissions in the product refining phase.

Our strategy has always been to be ahead of the times in terms of sustainable development.

That is why our die-casting plants are equipped with "Green Line" motors that have the following advantages: 80% energy savings, extremely reduced need for fluid cooling, significant reduction in noise levels.
